

ReLook Prompt Cheat Sheet

Melbourne Custom Build & Custom Upgrades

CUSTOM BUILD

CUSTOM UPGRADES

Proven prompt patterns for architectural builds and exhibition stands. Copy these, swap the specifics, and generate. Platform: relook.hthsystems.com.au

Materials & Finishes

METAL FINISH SWAP

"Change all the metal finishing (background and base object) to **[black metal matte / brushed gold / polished chrome]**"

Actual prompt from VRC champagne tower revision

SURFACE MATERIAL

"Replace the **[timber / concrete / render]** surfaces with **[marble / exposed brick / white plaster]**"

Works on: walls, floors, countertops, facade panels

GLASS & TRANSPARENCY

"Change the windows to **[tinted glass / frosted glass / clear glass with reflections]**"

For pavilion facades, office partitions, display cases

CLADDING SWAP

"Change the exterior cladding from **[dark panels]** to **[white aluminium composite / timber battens / corrugated metal]**"

Used for the AFL September Club facade revision

Structural Changes (Sketch Inpaint Mode)

HEIGHT ADJUSTMENT

"Raise the height of the **[curved wall / partition / bar counter]** as per the pink sketch"

Draw a pink overlay on the image showing desired height — AI interprets it

ADD ARCHITECTURAL ELEMENT

"Add a **[canopy / awning / rooftop terrace]** to the area marked in the sketch"

Sketch the rough shape + position, prompt describes what it should be

REMOVE ELEMENT

"Remove the **[column / barrier / signage]** in the marked area and fill with the surrounding material"

Paint over what you want removed, prompt tells AI what to replace with

EXTEND / WIDEN

"Extend the **[balcony / bar top / facade panel]** to the width shown in the sketch"

Draw the new boundary and the AI fills in consistently

Element Swapping (Multi-Reference Mode)

FURNITURE FROM REF

LIGHTING FIXTURES

"Change the stools of the 1st pic with the stool in the 2nd pic"

Actual prompt used — upload venue photo + product photo as references

"Replace the pendant lights with the **[chandelier / track lighting / globe lights]** shown in reference 2"

Upload the HTH product image or a mood reference

STAND RE-SKINNING

"Keep the same booth structure but rebrand for **[client name]** using the colours and logo from reference 2"

Exhibition teams: same shell, new client — instant pitch visual

COMBINE BEST ELEMENTS

"Use the bar layout from image 1, the seating from image 2, and the lighting from image 3"

Up to 5 references. Each adds a different element to the final composite

Exhibition Stands (Custom Upgrades)

BOOTH VISUALISATION

"Show this exhibition stand with **[LED backlit panels / living green wall / projector screen]** on the rear wall"

Great for upselling upgrade options to exhibitors

FLOORING UPGRADE

"Change the booth flooring to **[raised timber deck / branded carpet / polished concrete]**"

Flooring dramatically changes the perceived quality of a stand

Power Tips

- 1 Sketch inpaint = structural.** If you're changing shape, height, or position, draw it. If you're changing colour or material, just type it.
- 2 Be specific about what stays.** "Change the metal finish to black matte but keep the glass and timber as is" prevents unwanted changes.
- 3 Use 9:16 Vertical** for social media previews and client Instagram stories. Use standard for technical documentation and decks.
- 4 Premium 2K for client-facing.** Fast model for quick internal explorations. Premium for anything going into a proposal.
- 5 Multi-ref = composition.** Reference 1 is your base scene. References 2-5 are elements you want placed into it.
- 6 Material names matter.** "Black metal matte" is better than "dark metal." "Brushed brass" is better than "gold." Be precise.
